

Counterintuitive Marketing: Achieve Great Results Using Uncommon Sense

More and more companies are discovering that while it is possible to increase profits by cutting costs, it is not possible to downsize a business and still grow. Convinced that marketing new and existing goods or services is the least risky way for any company to expand, Kevin Clancy and Peter Krieg, who head COPERNICUS, one of the world's leading research and consulting organisations, gives managers both the theoretical framework for a strategically integrated marketing approach and the tools they will need to build marketing plans that work. In COUNTERINTUITIVE MARKETING Clancy and Krieg explain why it is essential to forge a vital link between strategic planning and marketing, as well as revealing how technological advances can make a critical difference in targeting, positioning, advertising, new product development, and pricing. This book also provides a two-page marketing questionnaire that every marketing department can use to keep on track.
