Measuring Ocean Currents: Tools, Technologies, and Data - Google Books Result Target recognition technology is a difficulty in the research field of household The experiment results show that this algorithm is not sensitive to the light

Handbook of Research on Emerging Perspectives in Intelligent - Google Books Result However, large amounts of unlabeled samples exist in remote sensing data analysis. The experimental results show that KGRR can achieve favorable . interests include image processing, automatic target recognition, and image fusion. **Review of current aided/automatic target acquisition technology for** the goal of a change detection method is to detect significant change while 2006), time series analysis (Eastman & Fulk 1993), change trajectory built-up areas, GIS updating and target monitoring and tracking (e.g. Pilon et al. solution based on the review of the current state-of-the-art change detection techniques. **Combinational matching method of amplitude-scale and time-shift** Apr 22, 2010 Automatic Target Recognition XX Acquisition, Tracking, Pointing, and Laser Show Abstract Shape-and-motion-fused multiple flying target recognition and tracking Multi-class target recognition based on adaptive feature selection target recognition is proposed for remote sensing image analysis. **Augmented Vision Perception in Infrared: Algorithms and Applied - Google Books Result** Experiments based on measured data show our algorithms have a remarkable larger Published in: Geoscience and Remote Sensing Symposium (IGARSS), 2011 IEEE International Robust obstacle detection and tracking by motion analysis is a challenge in the field of Radar automatic targets recognition(RATR). **Automated Target Recognition and Tracking Based on Shape** Buy Automated Target Recognition and Tracking Based on Shape (Remote Sensing Reviews Series) on ? FREE SHIPPING on qualified orders. **Automatic roads extraction from high-resolution remote sensing** Automated Target Recognition and Tracking Based on Shape has 0 reviews: Published January 1st 1992 by Routledge, 351 pages, Paperback. **The framework of target recognition in the field of remote sensing** In this paper, we propose a novel automatic target recognition algorithm based on The

experimental results show that with decision fusion, the probability of **Scientific Data Mining: A Practical Perspective - Google Books Result** Lowfrequency target strength and abundance of shoaling Atlantic herring *Clupea Harengus* during the Ocean Acoustic Waveguide Remote Sensing (OAWRS) 2006 experiment. Twisted window search for efficient shape localization. Vision and Pattern Recognition (CVPR). <http://Xplore/home.jsp>. **A Template Matching Procedure for Automatic Target Recognition in** Infrared Point Target Detection with Improved Template Matching. In Proceedings of IEEE International Geoscience and Remote Sensing Symposium, IGARSS 04. IEEE. Apple grading method based on features fusion of size, shape and color. Grader: A review of different methods of grading for fruits and vegetables. **Target recognition of household service robot based on shape** transform correlator (FJTC)-based automatic target recognition (ATR) system. . identification (RFID), remote sensing, and pattern recognition. He serves on the editorial board of the book series on Progress in Electromagnetic Research, **Overview of automated target recognition and tracking - Remote** Show Abstract Shape-and-motion-fused multiple flying target recognition and tracking Multi-class target recognition based on adaptive feature selection . Mutli-Dimensional Sensing and Processing . Performance of most automated systems is less than perfect, requiring an analyst to review the results to dismiss **Multi-dimensional Imaging - Google Books Result SAR Automatic Target Recognition based on Decision Fusion - IEEE** Abstract: Target recognition based on knowledge is a hot topic in remote sensing field. However, due to the deficiency of knowledge organization and usage, **MIPPR 2007: Automatic Target Recognition and Image Analysis** makes microwave radar a remote-sensing tool well suited to providing data on sea With smaller ones, distinction purely on the basis of imagery of the target is rather difficult. A common approach to the automated tracking of arctic ice had been to One method of tracking ice floes using shape comparison is based on **Graph Regularized Nonlinear Ridge Regression for Remote** Nov 15, 2007 Show Abstract Non-rigid object tracking using adaptive part-based model Automatic recognition of airport in remote sensing images based on improved methods .. Method of image enhancing based on shape feature of target This paper gives a whole review of existent algorithms and describes **Advances in Photogrammetry, Remote Sensing and Spatial Information - Google Books Result** An efficient method based on SOM neural network is proposed for extracting road networks from the high resolution remote sensing image. Finally, using Four-Direction Tracking approach, the road centerlines were tracked automatically. The experiment results show that this method is capable of rapidly and accurately **Automatic Target Recognition XX Acquisition, Tracking, Pointing** Area and length minimizing flows for shape segmentation. On automatic feature selection. International Journal of Pattern Recognition and Artificial Intelligence, 2:197220, 1988. [547] A Approaches to multisensor data fusion in target tracking: A survey. RST: The Remote Sensing Tutorial, 2008. <http://> **Conference Detail for Automatic Target Recognition XXVI - SPIE** provides a comprehensive review of recent deployment of infrared sensors in modern vision, including remote sensing, automatic target detection and recognition, object tracking, face and facial expression recognition, invariant shape **Conference Detail for Automatic Target Recognition XX - SPIE** Traditional road detection methods are not adequate for the rapid development of cities with increased complexity of the road junction shape. In this study, a water flow-based semi-automatic approach is proposed for extracting road Experimental results show that this proposed approach can accurately and efficiently **Automated Target Recognition and Tracking Based on Shape by** Therefore, an eight-stage ATR scheme based on the hybrid algorithm is proposed. The experimental results show its practicability in the application. for use in automatic target recognition (ATR), data compression and scattering studies. **Optoelectronic 3-D Object Classification From 2-D Images - IEEE** Published in: Urban Remote Sensing Joint Event, 2007 Space-based bistatic GMTI using low resolution SAR (Perissin and Rocca, 2005)) by processing coherently long series of images. of urban targets can be estimated and a system for automatic recognition of a set of scattering structures can be developed. In this Sadjadi F. and C. Chun, Automatic detection of small objects from their Detection and tracking of RC model aircraft in LWIR microgrid polarimeter data, in imaging for target detection?, Journal of the Optical Society of America A, vol. and reflection angle estimation for remote sensing applications, Applied Optics, vol. **Target recognition by means of spaceborne C-band SAR data** A target selection method based on multi features fusion is proposed to improve are used to correct the in-lane probability data provided by lidar, track and predict the The selection method utilizes the valid information collected by sensors Experiments show that the vehicle detection results can be improved and the **An automatic target recognition (ATR) scheme in colored Gaussian** Synthetic aperture sonar: A review of the current status Estimation of 3D shape from high resolution sonar imagery for target identification Graph-Based Supervised Automatic Target Detection Geoscience and Remote Sensing 2015 Three-Dimensional Underwater Target Tracking With Acoustic Sensor Networks. **Robust Methods for the Analysis of Images and Videos for Fisheries - Google Books Result** Monday 18 April Show All Abstracts A fast

automatic target detection method for detecting ships in infrared . In this paper, we review evaluation metrics and popular evaluation schemes Defense + Commercial Sensing Plenary Session . Fast tracking based on local histogram of oriented gradient and dual detection
